**Virginia Coal Employment and Production
Incentive Tax Credit**

Effective for taxable years beginning on or after January 1, 2022, the Virginia Coal Employment and Production Incentive Tax Credit has expired. No new credits can be earned after this date, however electricity generators that originally earned the credit may carry forward amounts of credit for up to 10 taxable years or until the full amount is used, whichever is sooner. Effective for credits earned on or after July 1, 2016, but before January 1, 2022, persons with an economic interest in coal that receive an allocation of credits may no longer receive refunds of such credits and may not carry forward unused amounts of credits for use in future taxable years.

Effective for taxable years beginning on and after January 1, 2022, a taxpayer claiming carryover credits on a return may not claim more than \$1 million in credits for a single taxable year. No taxpayer may amend a return for a taxable year beginning before January 1, 2022, to claim more credits than the amount included on such return before amending it. Persons with an economic interest in coal that receive a transfer of credits may not receive refunds of credits and may not carry forward unused amounts of credits for use in future taxable years. For additional information regarding the application of carryover credits, see the Schedule 500CR Instructions.

Line Instructions

Use Form 306D to:

- 1) list each state tax which the Coalfield Employment Enhancement Tax Credit will be used to offset, and
- 2) calculate the amount of Coalfield Employment Enhancement Tax Credit that will be allowed on your income tax return.

Part I – Credit Designation

Section 1 – Tax Payment Details

General Instructions for Section 1

List each qualifying current year state tax paid to the Virginia Department of Taxation or any other state agency during the taxable year on Lines 1-5. Taxes paid to federal or local government agencies do not qualify.

Qualifying state taxes are those incurred and paid by you. Examples of qualifying taxes paid to the Virginia Department of Taxation are the corporate income tax, tire tax, and retail sales tax (to the extent that the sales tax was paid for nonexempt purchases for use by you). Taxes which are merely collected, held in trust, and then remitted to the Department of Taxation do not qualify for this credit. Examples of non-qualifying taxes include employer withholding tax and retail sales tax paid by your customers. In addition, this credit may not include any addition to tax (computed on Forms 760C, 760F, or 500C), penalty, interest, or prior year taxes.

The credits must first be applied against the income tax shown on your income tax return and then against all other taxes imposed by the Commonwealth of Virginia that were incurred and paid by you during the taxable year.

When completing Lines 1-5, enter the tax shown on your income tax return, less any other tax credits claimed which have a higher priority. As a general rule, credits are claimed in the order in which they provide the best tax advantage. For example, credits without carryover provisions are generally claimed before credits with carryover provisions.
